## Login Form

Design the following web page, and solve the given requirements:

LoginSignup

Email

Password

Submit

1. Construct the above elements and make it to be aligned to center of the page.
2. The page should be a responsive web page.
3. The buttons, "Log In" and "Sign Up" must be a bootstrap info button and all "Submit" and 'Reset' buttons are bootstrap primary buttons.
4. Both the Login and sign up are a single web page, On clicking Sign Up, the sign-up form should be displayed.

Sign up form should be like:

Name\*

Gender\*

None

Age\*

Password\*

Minimum 6 Character

Confirm-Password\*

submit

Reset

- Note:**
1. Use the bootstrap class "btn btn-info" for bootstrap info buttons and "btn btn-primary" for bootstrap primary buttons
2. Do not alter the given 'login.html' file. Write the jQuery code in the 'login.js' file.
3. **Avoid writing the jQuery 'document ready' method for the proper web page visibility.**
4. **Do not use 'ES6' features.**
