## Bootstraps Navigation Bar

Design a web page as indicated in the snapshot below:

**Topics Coverage:** Bootstrap Navigation and table classes

**Key Points:**

1. Create a div tag for an inverted navigation bar using Bootstrap classes. It should be within the header tag with the class “**container**”.
2. Make the navigation bar collapsible by using a ‘**div**’ tag.
3. Create an unordered list of links for: ‘Home’, ‘About Us’, and ‘Contact’ belongs to the bootstrap navigation bar class and makes the list anchor value ‘Home’ active.
4. Create another unordered list for ‘**Login**’ which should belong to the bootstrap navigation bar aligned to right.
5. Create a bootstrap hover table with the table column headings: **No, Bill, Payment Date, and Payment status.**

Table contents should be the same as given below.

**Table Contents:**

| No | Bill        | Payment Date | Payment Status |
|----|-------------|--------------|----------------|
| 1  | Credit Card | 05/07/2018   | Pending        |
| 2  | Internet    | 05/07/2018   | Paid           |
| 3  | Electricity | 03/09/2018   | Pending        |
| 4  | Telephone   | 05/07/2018   | Due            |

According to the payment status, choose appropriate contextual classes for each row.

- **Pending status:** Indicates a warning that might need attention
- **Success status:** Indicates a successful or positive action
- **Due status:** Indicates a dangerous or potentially negative action
