Vertical Menu

Design an html page which should contain a vertical menu using a div tag. Inside the div, a menu is created by using , and <a> tags of HTML.

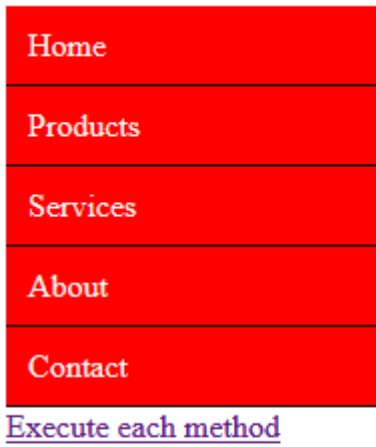

So hierarchy is: **div >> ul >> li >> a**

See the sample Page:

When you click on the link “*Execute each method*”, it should display the menu names one below the other in a div tag with the id: '**msg_ex**'. Also, the background color of menu items should change to ‘red’ in color by using hierarchy (parent/child). Refer to the images for more clarifications.

Sample page after clicking ‘Execute each method’:

Home
Products
Services
About
Contact

Note:

Do not alter the given 'menu.html' file. Write your jQuery code in the file 'menu.js'.

Avoid writing the jQuery 'document ready' method for the proper web page visibility.

Do not use 'ES6' features.
