Description   Submission   Code Editor   Grading view
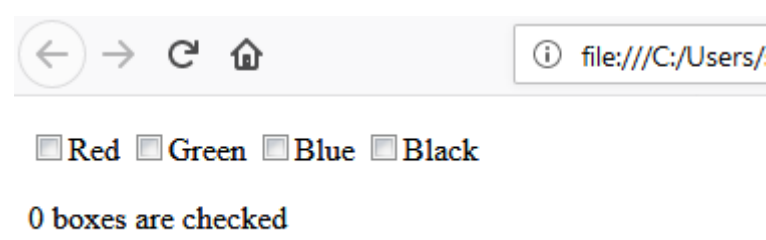

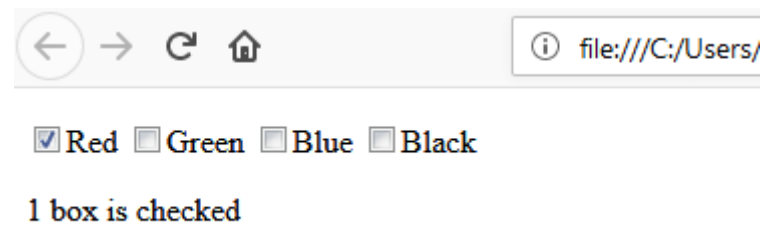

Select the Boxes

Design an HTML page that contains four checkboxes with the values: Red, Green, Blue, and Black.   Using jQuery functions you have to check whether the checkboxes are checked or not and also display a number of checkboxes checked. Create a <div> tag with the id "result" to display the message as specified in the below images.

Note:
Do not alter the given 'chkbox.html' file. Write your jQuery code in the file 'chkbox.js'.
Avoid writing the jQuery 'document ready' method for the proper web page visibility.
Do not use 'ES6' features.

Sample HTML page before checked:

☐Red ☐Green ☐Blue ☐Black

0 boxes are checked

Sample HTML page after checking one check box:

☑Red ☐Green ☐Blue ☐Black

1 box is checked

Sample HTML page after checking three checkboxes:

☑Red ☑Green ☑Blue ☐Black

3 boxes are checked
