🎨 Dashboard / User Interface Design / jQuery / Get JSON Data

Description   Submission   Code Editor   Grading view

Get JSON Data

The given URL contains various user information.

https://reqres.in/api/users?page=2

Design a webpage that should display the contents of this JSON response *(ONLY THE 'ID' AND 'EMAIL')* when the user clicks the button 'Click to Load Data' with the id 'btn-id'.   The contents of the JSON should be displayed in the 'div' tag with the id 'data-id'. Refer to the below image for more information.

Note:
1. Do not alter the file, country.html
2. Write your code in country.js file
3. **Avoid writing the jQuery 'document ready' method for the proper web page visibility.**
4. **Do not use 'ES6' features.**

Sample page:

Click to Load Data

- 7 -- michael.lawson@reqres.in
- 8 -- lindsay.ferguson@reqres.in
- 9 -- tobias.funke@reqres.in
- 10 -- byron.fields@reqres.in
- 11 -- george.edwards@reqres.in
- 12 -- rachel.howell@reqres.in
